Network Health Score

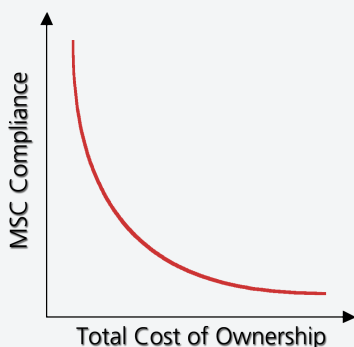

Patch Score	31% *1/5
OS Score	100% *1/5
Disk Score	86% *1/5
Event Log Score	100% *1/5
AV	97% *1/5

83%

Criteria

To qualify for our **Fixed Cost Managed Service** your IT environment must meet certain criteria. The higher the level of compliance the lower the Total Cost of Ownership (TCO) of your IT.

Netlink Group's compliance model is based on a combination of industry best practice and the standards Netlink Group has developed for corporate IT environments over the past 15 years. IT Infrastructure supported by Vendors warranties, proactive management and maintenance, industry standard software solutions and correctly configured, reputable hardware provides a proven lower Total Cost of Ownership (TCO). TCO includes not only hardware upgrades, replacement and fault management but the cost of maintenance and support over the life of the network.

Base Level Compliance

- All server with a Microsoft OS must be Windows 2003 or later
- Servers must have the latest Service Pack and Critical Updates installed
- All desktops/laptops must be Windows XP Professional or later
- All desktops/laptops must have the latest Service Pack and Critical Updates installed
- All server & desktop software must be genuine, licensed and vendor supported
- All server hardware must be under a current vendor warranty
